**Cambodia Academy of Digital Technology (CADT )**
2023 - Present

Bachelor's Degree of Computer Science specialize in Software Engineering

## EXPERIENCE

### Jomnouy website - Capstone Project
Jan 2025 - Feb 2025
**Frontend & Backend**

- Developed both the backend and frontend for JOMNOUY, an investment platform using Laravel and React.js and tailwind CSS.
- Designed and implemented an attractive and responsive UI using Tailwind CSS for a smooth user experience.
- Built and optimized a MySQL database to handle user data, projects, and transactions efficiently.
- Set up authentication and role-based access control for three user roles using Laravel and MySQL.
- Developed and integrated REST APIs to enable seamless communication between the Laravel backend and React.js frontend.
- Worked with a team using GitHub for version control and Figma for UI/UX design collaboration.

### Ecommerc- School Project
March 2024 - May 2024
**Frontend & Backend**

- Developed both frontend and backend for an eCommerce platform using PHP for the backend, HTML, Bootstrap, and CSS for the frontend, and MySQL for database management.
- Implemented features like product listings, shopping cart, and user authentication.
- Designed a responsive interface to enhance user experience across devices.

### Khoding-Hero - CADT
August 2023 - September 2023
**IT Trainer**

- Taught basic technologies such as Ms word,Excel and scratch skills to high school students.
- Mentored students in building simple game and improving their technical knowledge about Microsoft 365.

### Hospital Management
**BackEnd-Developer**

- Developed and maintained the backend of a Hospital Management System using Java and store in text file.
